**RE:** Patent application

Dear Greg,

Responding to your latest request regarding the signing of "Assignment of US Right to corporation" and the "Declaration of Power of Attorney for Patent Application", I would like to make the following points:

1) I am not prepared to corresponded with Lawyers and Solicitors as I do not understand their jargon, and I am not prepared to be belittled by their command of English. English is still a foreign language to me and I do not fully understand the meaning of their letters, therefor reject to respond to their letters.

2) I made a contract on the 22 Jan 1999 with Anthony Maslin a former neighbour of mine who also promised "I look after you mate" and for that reason would like to deal with him directly. He is now Managing Director of SES.

I honoured the agreement between myself and SES to the last detail in all honesty. My business including all information, "intellectual property" and technical know-how is well and truly in SES's name and the transfer of my knowledge that was part of my business is complete.

Most certainly, your decision to run the business without further impute from me is proof enough that the business transfer is complete and that I have nothing to offer to SES. I have no control of what happened to patent applications hence I need to be fully informed before I can sign this forms.

I totally and utterly reject your allegations of being misleading or deceptive at any time - and everyone of the founding members of SES is well aware of my honesty, openness and indeed outspokenness.

As far as I am concerned, SES may take out any patent it likes in SES' own right and in SES's own name. The Agreement of the 22/01/99 does not contain any obligation for me to lodge an patent application. This Agreement was made in Australia and for Australia only with exception of the paragraphs regarding the South African company "Conlog".

3) I'm uncertain of the risks signing documents such as "Assignment of US Right to corporation" and the "Declaration of Power of Attorney for Patent Application" and of possible consequences.

I therefor do not regard it as unjustified to ask for a sum of money as there are no Royalty payments in place. You are aware of the reservations the first patent attorney made regarding the patentability of the Poly Piston Pump (from memory Anthony Maslin showed me one day a patent application from the eighties regarding a Piston Pump?) and I made the founding members of SES aware right from the beginning that it may not be patentable because it has been in the public arena for some time. Prior signing the Agreement of January '99, Robert Schlegel and myself went to talk to an patent attorney to get some information about the possibility of acquiring full patents for any of the my products.

4) If I was to sign the documents in question I would firstly need to be satisfied that it is not against the patent law or any other law to do so.

Secondly that I would not only need to be indemnified by SES for any consequences, but I would require a contract with SES to mak certain that SES bears all risks and foreseeable and unforeseeable consequences about:blank

possible. And that is takes full responsibility for the application of such patent. Further that SES is responsible to cover any law suit may arise against me as a result of such patent.

Conditions to look into this documents:

- a) Point one and two of my e-mail dated 9.7. 01. still have to be resolved.
- b) A deposit of \$ 5000. has to be payed into my account to cover my time spent on this matter. (Up to date 3 1/2 h)
- c) I need my 1 666 666 options released for trading immediately.
- d) I want you to assign all rights of the Air Pump design to me in writing, as you declared having no interest in it's design or application.
- e) SES has to pay for a patent attorney of my free choice to check up on the patent applications.
- f) SES has to pay for a Solicitor of my free choice to draw up a contract
- g) SES has to pay an amount of money to sell the products in America or if required worldwide.
- h) SES has to take all responsibility and consequences as drawn up in a contract.
